

Which department oversees fiber optic cable companies

Overview

The Federal Communications Commission (FCC) is an independent agency of the United States federal government that regulates communications by radio, television, wire, internet, Wi-Fi, satellite, and cable across the United States. ISPs are overseen by multiple agencies, from the FCC and FTC to state governments. Provides discounted home phone and cell phone services to qualified households. 50% discount to qualifying K-12 schools. Internet Service Providers (ISPs) occupy a critical role in modern digital infrastructure, acting as the gateway to the internet for homes, businesses, and mobile devices. The FCC maintains jurisdiction over the areas of broadband access. The regulatory responsibility for Internet and telecom services in California lies with the California Public Utilities Commission (CPUC). It drafts and executes strategies for the telecom industry, which includes ensuring affordable, fair access to essential services and removing barriers that. These fiber optic cables, which use light to transmit data, offer unparalleled speed and bandwidth compared to traditional copper cables, making them indispensable for both individuals and businesses.
