

Which trademark category does fiber optic cable belong to

Overview

Trademark is one of the class or category of 45 trademark classification which is covered under Nice Classification. A Nice Trademark Classification (NCL) is an international system for categorizing goods and services for trademark registration. Developed by the World Customs Organization (WCO), it is used by more than 200 countries as a basis for their customs tariffs and for the collection of international trade. Trademark registration is a crucial requirement for the businesses who are willing to establish a distinct business image in the marketplace in this competitive era. All goods and services are “classified” or organized into broad categories of goods or services, as determined by. The present ruling (HQ 963213), pertains to the classification of optical fiber cable, specifically: “1) lightweight, 2) lightweight protected, 3) single armour, 4) single armour light, and 5) double armour cables.
