

Xiaomi 10 Gigabit Switch Fiber Optic

Article Overview

The Xiaomi 10G switch supports dual 10G SFP+ ports for fiber or high-speed modules, while the consumer Xiaomi Mi 10 Gigabit Ethernet Switch is strictly copper-based with RJ45 ports and does not support fiber.

Xiaomi 10G Switch with SFP+ Ports

The Xiaomi 10G switch is designed for small offices or high-speed home setups. It features:

- 2 x 10G SFP+ ports: These ports support fiber optic or compatible 10G modules, allowing connections to 10G optical modems, NAS devices, routers, or workstations at full 10Gbps speed .
- 4 x 2.5G RJ45 ports: These support multiple speeds (10/100/1000/2500 Mbps) for connecting standard devices like PCs, TVs, or game consoles .
- Total forwarding capacity: 60Gbps, ensuring low-latency, zero-packet-loss transmission .
- Fanless design: Energy-efficient with side and bottom heat dissipation, suitable for quiet environments .
- Plug-and-play: No complex configuration required, though SFP+ modules must be compatible with the switch. This model is ideal if you need true 10Gb fiber connectivity for high-speed networking or linking multiple 10G devices.

Xiaomi Mi 10 Gigabit Ethernet Switch (Consumer Model)

The Xiaomi Mi 10 Gigabit Ethernet Switch is a more consumer-oriented device:
